

# **CNSI Government Services Appraised at CMMI Level 3**

Rockville, MD – April 28, 2017 – CNSI, one of the world's leading business solutions providers with vast experience developing and delivering innovative information health care management technology solutions, today announced its Government Services Organization Unit has been appraised at Level 3 of the CMMI Institute's Capability Maturity Model Integration (CMMI) following an independent CMMI appraisal performed by CUNIX Infotech Pvt. Ltd.

CMMI is a capability improvement framework that provides organizations with the essential elements of effective processes that ultimately improve their performance.

"Earning CMMI Maturity Level 3 is a significant achievement," said Adnan Ahmed, co-founder and president of CNSI. "It demonstrates our entire team's commitment to operational excellence and ultimately serves to deliver value to our customers."

An appraisal at maturity Level 3 indicates the organization is performing at a "defined" level. At this level, processes are well characterized and understood, and are described in standards, processes, procedures, tools, and methods. The organization's set of standard processes, which is the basis for maturity Level 3, is established and improved over time.

CMMI Institute is the global leader in the advancement of best practices in people, process, and technology. The Institute provides the tools and support for organizations to benchmark their capabilities and build maturity by comparing their operations to best practices and identifying performance gaps.

**About CNSI**

CNSI delivers a broad portfolio of information technology (IT) and business process outsourcing (BPO) solutions to a diverse base of federal, state and local government agencies, and commercial enterprises.
